

## **Aquasonic® Aguaceiro™ Is On The Shelf And Available For Purchase**

FOR IMMEDIATE RELEASE - Denver, CO – (3/15/12) - Clark Synthesis, Inc., the worldwide leader in total immersion sound technology, announces the highly anticipated Aguaceiro™ MultiClimate Airspeaker is now in stock and ready for purchase. Bill Phillips, President of Clark Synthesis, is very excited to make this speaker available to customers:

“We’ve wanted to carry outdoor speakers for a long time and now we’re proud to offer speakers that meet our incredibly high standards for performance and durability. This product goes above and beyond and I’m excited to get it into people’s hands. I know they will be more than satisfied.”

The Aguaceiro™ is the newest addition to the Clark Synthesis Aquasonic® line of outdoor living speakers and boasts many advantages. The Aguaceiro™ is weatherproof in any environment where people live, work or play, and can handle the extremes of both temperature and weather. Clark Synthesis is so confident in the performance and durability of this outdoor speaker, it comes with a limited lifetime warranty.

Since its inception in 1994, Clark Synthesis is recognized worldwide as the leader in exceptional audio technology. Clark Synthesis serves a wide spectrum of markets internationally. The Aquasonic® product line features the world’s only full-frequency, full-fidelity underwater loudspeaker, along with other specialized transducers used in spas, outdoor living and marine applications. The Full Contact Audio® indoor transducers are used in home theaters, gaming, ProSound and military applications. With a flexible product line, a strong industry reputation, and a commitment to excellent customer service, Clark Synthesis products redefine the world of audio.
