

### PROSOUND429 PACKAGE

The ProSound429 Platinum Thumper is the most powerful thumper available from Clark Synthesis. It is the first choice for many professional touring musicians. The ProSound429 Package includes: (1) ProSound429 Platinum Thumper (1) TC-101 Amplifier Interface with (2) Speak-on Connectors, (1) Gig Bag, and all the hardware for mounting the thumper to a drum throne, platform or staging.

Originally developed for military simulation devices, the Full Contact Audio<sup>®</sup> Professional Transducers were specifically designed to transfer sounds like gunshots and explosions into a tactile experience that can be felt as well as heard. This technology transferred to the music industry, and every knowledgeable drummer or sound stage touring manager will choose Clark Synthesis Professional Transducers over any other option due to their amazing performance quality and reliability. The TC-101 serves as a protection device to limit peak signals.

The ProSound429 Platinum requires an amplifier for operation. Clark Synthesis recommends an amplifier stable at 4 ohms that can deliver 125-150 watts @ 4 ohms (per transducer).

**Prosound429 Specifications:**

- Continuous power handling: 135 watts
- Impedance: 4 ohms
- Overload Protection: Polyswitch
- Frequency Response: 5Hz to 17kHz
- Electrical Connection: 3ft. - 16 gauge, 2 wire
- Dimensions: 8 in. diam. x 2.25 in. high
- Recommended Amplification: 125 - 150 watts at 4 ohms
- The Prosound429 is not approved for vertical mounting.
