

Torden™

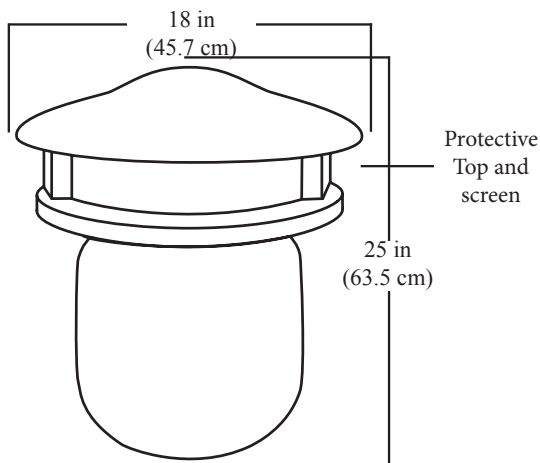

Aquasonic®

MULTICLIMATE SUBWOOFER

The Torden™ MultiClimate Subwoofer brings full, rich bass to outdoor sound, no matter the environment. Bury it in the hot sand, freezing snow or the deepest part of a rain forest and it will perform as if it had just been taken out of the box. With a 12-inch driver and internal resonate chamber, the Torden™ delivers both smooth and powerful bass. You will be astonished when you hear the stand-up bass of a jazz quartet, the bass section of an orchestra or the punch of a hard rock band. If you have an outdoor cinema, you will enjoy special effects with a quality that other subwoofers can only dream to replicate.

Like the Aquaceiro™ MultiClimate Airspeaker, the Torden™ Subwoofer can be integrated into any landscape design, and will blend perfectly with your outdoor decor. Preinstalled with your Torden™ is a protective cover and screen. Just like the Aquaceiro™, the Torden™ Subwoofer comes with a limited lifetime warranty.

** The Torden™ comes preassembled with protective top and screen.*

Torden™ displayed in a decorative planter. Planter not included.

Specifications: Frequency Response: 25Hz - 120Hz * Power Handling: 200 Watts Continuous
* Impedance: 8 Ohms * Weight: 26 lbs. (11.8kg) * 6 ft. (1.8m) Cable Attached
