

Isolation Transformer

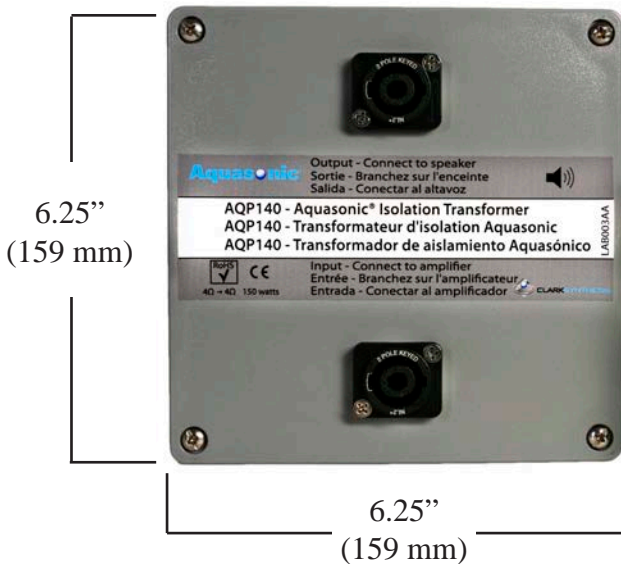

The Aquasonic® Isolation Transformer is expertly designed for use when a no-conduction connection is required between an underwater speaker and the audio amplifier.

The Clark Synthesis Isolation Transformer is 96% efficient and is designed for use with our Aquasonic® Diluvio™ Underwater Loudspeaker. It is acoustically transparent and housed in a moisture-resistant enclosure that has built-in mounting tabs attached.

The Clark Synthesis Isolation Transformer comes installed with two Neutrik® Speakon® connectors (not cheap substitutes) and includes two Neutrik® Speakon® connectors for easy connection to amplifier and speaker wiring.

Isolation transformer with two speakon connectors.

Back side - with mounting tabs.

Specifications: 6.25" (159 mm) W x 6.25" (159 mm) D x 4.375" (112 mm) H * 5.7 lbs (2.6 kg)
